HOW TO CLEAN YOUR VERSAWARE™ SLOW COOKER

Before moving and cleaning the Slow Cooker:

- **ALWAYS** switch off and unplug from the electrical socket.
- **ALWAYS** allow the appliance to cool.

NEVER IMMERSE THE HEATING UNIT IN WATER OR ANY OTHER LIQUID

HEATING UNIT

DO NOT immerse in water or any other liquid. Clean with a soft cloth which has been dampened with warm soapy water and wrung out. Dry with a clean dry cloth. DO NOT use abrasive cleaners.

Caring for the removable Stoneware Cooking Pot

The removable Stoneware Cooking Pot and the lid go safely into the dishwasher or may be washed in hot soapy water. Do not use abrasive cleaning compounds - a cloth, sponge or plastic spatula will usually remove any stubborn residue.

To remove water spots and other stains, use a non-abrasive cleaner or vinegar.

As with any fine ceramic, the Stoneware Cooking Pot will not withstand sudden temperature changes.

- If the Stoneware Cooking Pot has been pre-heated or is hot to the touch, DO NOT add refrigerated food. DO NOT pre-heat the Versaware™ Slow Cooker unless specified in the recipe. The Stoneware Cooking Pot should be at room temperature before adding hot foods.
- Wash the Stoneware Cooking Pot straight after cooking, use hot water. DO NOT pour in cold water if the Stoneware Cooking Pot is hot. Do not use abrasives or scouring pads or powder. Avoid using harsh abrasive cleaners or scouring pads as continued use will scratch the highly polished surface and make subsequent cleaning more difficult.

COOKING HINTS AND TIPS

- Trim fats and wipe meats well to remove residue. (If meats contain fats. Brown in the versaware cooking pot and drain well). Season with salt and pepper. Place the meat in the cooking pot on top of vegetables.
- For pot roasts and stews, pour liquid over the meat. Use no more liquid than specified in the recipe. More juices are retained in meat and vegetables during slow cooking than in conventional cooking.
- Most vegetables should be thinly sliced or placed near the sides or bottom of the Stoneware Cooking Pot. In a Slow Cooker, meats generally cook faster than most vegetables.
- Use whole leaf herbs and spices for the best and fullest flavour from the slow cooking method. If ground herbs and spices are used, they should be stirred in during the last hour of cooking.
- Because there is no direct heat at the bottom, always fill the Stoneware Cooking Pot at least half full, to conform with recommended times. Small quantities can be prepared, but cooking times may be affected.
- A specific liquid called for in a recipe may be varied if an equal quantity is substituted. For example, substituting a can of soup for a can of tomatoes or 1 cup of beef or chicken stock for 1 cup of wine.
- Beans must be softened completely before combining with sugar and/or acidic foods. (NOTE: Sugar and acid have a hardening effect on beans and will prevent softening).
- Dried beans, especially red kidney beans, should be boiled before adding to a recipe. Cover the beans with 3 times their volume of unsalted water and bring to the boil. Boil for 10 minutes, reduce the heat, cover and allow simmer for 1½ hours or until the beans are tender. Soaking in water, if desired should be completed before boiling. Discard the water after soaking or boiling.

GUIDE TO ADAPTING RECIPES

This guide is designed to help you adapt recipes for the Versaware™ Slow Cooker- your own favourites and prized recipes collected from friends, food companies, newspapers and magazines. Our aim is to save preparation time with fewer steps and less dirty dishes. and to keep cooking simple. In most cases all ingredients can go into your Slow Cooker in the beginning and cook all day. Many of the normal preparatory steps are unnecessary when using the Versaware™ Slow Cooker.

A few hints:

- Allow sufficient cooking time.
- Cook with the lid on.
- Do not add as much water as some non Versaware™ recipes indicate.
- Remember - liquids do not "boil away" as in conventional cooking. Usually at the end of the cooking, you will have more liquid than less.
- This is "one-step" cooking: many steps in recipes can be deleted. Add ingredients to the Stoneware Cooking Pot at one time, adding liquid last, then cook for 8 - 10 hours.
- Vegetables do not overcook as they do when boiled on the hob or in the oven. Therefore everything can go into the Versaware™ Slow Cooker at one time. EXCEPTION: Milk, soured cream or cream should be added during the last hour of cooking.

TIME GUIDE

Most uncooked meat and vegetable combinations will require at least 8 hours on LOW

IF RECIPE SAYS:	COOK ON LOW:	OR COOK ON HIGH:
15 to 30 minutes	4 to 6 hours	1½ to 2 hours
31 to 45 minutes	6 to 10 hours	3 to 4 hours
50 minutes to 3 hours	8 to 10 hours	4 to 6 hours

PASTA AND RICE

If a recipe calls for cooking noodles, pasta or macaroni etc., cook on the hob in a saucepan before adding to the Slow Cooker. Do not overcook - just until slightly tender.

If rice is required, stir in with other ingredients. Add 60ml (4tbsp) cup of extra liquid per 60ml (4tbsp) cup of raw rice. Use long grain rice for best results.

LIQUIDS

Use less in Slow Cooking - usually about half the recommended amount. 250ml (8 fl.oz) of liquid is usually enough, unless it contains rice or pasta

SAUTEING VEGETABLES

This is generally not necessary. Stir in chopped or sliced vegetables with other ingredients. The only exception to this is Aubergine which should be parboiled or sautéed, due to its strong flavour. Since vegetables develop their full flavour potential with slow cooking, expect delicious results, even when you reduce quantities. Because vegetables take longer to cook than meat, slice or chop them where possible.

HERBS AND SPICES

Leaf or whole herbs and spices are preferred, but their flavour power may increase, therefore use half the recommended amount. If you use dried ground herbs and spices, add during the last hour of cooking.

MILK

Milk, cream and soured cream tend to breakdown during extended cooking. When possible, add during the last hour of cooking. Condensed soups may be substituted and can cook for extended times.

SOUPS

Some soup recipes call for 2 - 3 litres of water. Add other ingredients to the Removable Cooking Pot, then add the water only to cover. If thinner soup is desired, add more liquid at serving time. If milk based recipes have no other liquid for initial cooking, add 1 or 2 cups of water. Then during the final hour add milk or cream as required.

QUESTIONS AND ANSWERS

Q "What if the food is not done after 8 hours..... when the recipe says 8 - 10 hours".

- A This can be due to voltage variations, altitude or even extreme humidity. Slight fluctuations in power are not normally noticeable on most appliances, however with Slow Cookers it can alter the cooking times. Allow plenty of time and remember, it is practically impossible to overcook. You will learn through experience whether to increase or decrease cooking times.

Q "Must the Slow Cooker be covered. Is it necessary to stir".

- A Always cook with the lid on. If the lid is removed, the Slow Cooker will not recover heat losses quickly on LOW setting. Significant amounts of heat escape whenever the lid is removed, therefore cooking times are extended. Avoid frequent removal of the lid for checking cooking progress or stirring. Never remove the lid during the first two hours when baking breads or cakes. It is not necessary to stir whilst cooking on LOW heat. Whilst using HIGH heat for short periods, occasional stirring improves the distribution of flavours.

Q "How about thickening juices or making gravy".

- A Add some quick cooking tapioca to any recipe if you want to make a thick gravy. Add the tapioca at the beginning and it will thicken as it cooks. Alternatively, you can remove the solid foods, leaving the juices. Then prepare a smooth paste of approximately 100g (4oz) of flour or cornflour to 90ml (6tbsp) water or 4 tablespoons of melted butter. Pour the mixture into the liquid in the Stoneware Cooking Pot and stir well. Turn to HIGH and when it comes to the boil (about 15 minutes) it is ready.

Q "Can I cook a roast without adding water".

- A Yes - if cooked on LOW. We recommend a small amount of water because the gravies are especially tasty. The more fat or "marbelling" the meat has, the less liquid you need. The liquid is needed to properly soften and cook the vegetables.

RECIPES

PORK LOIN WITH SHERRY AND RED ONIONS

The mild flavour of the pork is awakened by the rich, delectable sauce

2 large red onions, thinly sliced
175g (6oz) silver skin (button) onions, blanched and peeled
40g (1½oz) butter
salt and freshly ground black pepper
1.2kg (2½ lb) boneless pork loin, tied
45ml (3tbsp) cooking sherry
small handful of flat leaf parsley, chopped
25ml (1½ tbsp) cornflour
15ml (1tbsp) water

In a medium skillet or frying pan, sauté the red onions and silver skin onions in the butter until soft. Season with salt and pepper. Rub the pork loin with salt and pepper and place in the Slow Cooker. Add the sautéed onions, sherry and parsley. Cover and cook on LOW for 8 - 10 hours (or on HIGH for 5 - 6 hours). Remove the pork loin from the Stoneware Cooking Pot and let stand for 15 minutes before slicing. Turn the Slow Cooker to HIGH. Combine the cornflour and water and then add to the juices in the Stoneware Cooking Pot, stirring continuously. This will thicken the sauce. Serve the pork loin with the onion and sherry sauce. Serves 4.
